

maepsa

Solution driven.
Performance given.

About Us

maepsa is a leading supplier, stockist and distributor of process, control and safety valves, actuators, measuring instruments, control and automation systems and specialized equipment for the upstream, downstream and energy markets offering high quality solutions for each one. We have a broad portfolio of globally recognized brands and in-house services.

Serving across Mexico and LATAM, our strength lies in the variety of products and components we stock to integrate solutions in a short period of time. **maepsa**'s facilities offer a wide range of Engineering, Automation, Integration and Test Services that ensure clients have access to our group of highly experienced engineers and quality technicians in different specialty areas, offering quality service and customer support 24/7.

Through the years we have developed the expertise, efficiency and commitment that all specialized industries require and have pride in our team of expert engineers. The quality of our staff is one of the strengths of our organization and translates into premium service to our customers.

With a clear vision of what needs to be accomplished for the critical industry sectors we service, **maepsa** is continually improving its business and service to its clients. **maepsa** was built on a foundation of excellence in service, superior product quality and stock range, positioning the company as a clear market leader providing quality products on time.

Locations

With facilities strategically located across different cities in Mexico and Houston, USA; maepsa is recognized as a valued supplier giving solutions not only with quality products but technical expertise, after-sales support, in-site consultation, service and training.

We take pride in our ability to serve customers through a team approach across all our facilities. Satisfying our customers' requirements is our first priority. From the moment an opportunity is given to us, we provide value that translates into reliability, commitment, results and a long-term business relationship delivering quality products and service.

Products

Our products have several applications in different industries and offer high quality solutions for each one. We carefully select these products to ensure that our customers can get exactly what they need to suit the needs of their process applications.

Masoneilan

- Globe Control Valves
- Rotary Control Valves
- Butterfly Control Valves
- Severe Service Valves
- Actuators
- Positioners
- Air Filter Regulators
- Accessories

Consolidated®

- Safety & Relief Valves
- Safety & Relief Valves Pilot Operated

YOKOGAWA

Equipment of Measurement, Automation & Control

- Differential & Gauge Pressure Transmitters EJX, EJA
- Temperature Transmitter YTA
- Wireless Instrumentation
- Flow Transmitters (Magnetic Vortex, Coriolis, Rotameters)
- Liquid & Gas Analyzers
- Recorders & Data Acquisition
- Paperless Recorders
- Single-loop Controllers
- Distributed Control System (DCS) "Centum VP"
- Safety Instrumented System (SIS) "PROSAFE RS"

- Pneumatic & Hydraulic Control Valves.
- Low Pressure Regulators & Filter Regulators
- Quick Exhaust Valves & Bleed Valves
- Shuttle & Relief Valves

These valves may be actuated by solenoid, pilot, manual, or mechanical.

- Solenoid Valves of high pressure for Hydraulic & Pneumatic Controls of 3-4 way to use in hazardous locations.

- Pressure Switches
- Dial Pilots
- Level Switches
- Relays
- Tattletale Indicators
- Quick Exhausts
- Sand Probes
- Hydraulic Controllers
- Emergency Shutdown
- Fuse Plugs
- Vent Screens
- Panel Accessories
- Relief Valves
- Check Valves
- Regulators

- Tube Fittings
- Needle Valves
- Bleed/Purge Valves
- Manifold Valves/Check Valves
- Tubing

- Position Monitors
- Limit Switches
- Positioners
- Position Transmitters

- Position Transmitters
- Limit Switches
- Manual Valve Limit Switches
- Magnetic Limit Switches

- Air Cooled Heat Exchangers
- High- Efficiency Axial Flow Fans

- Self Contained Valve Actuator Lineal or Quarter Turn.

- Safety Relief Valves Threaded & Flanged, Snap Pilot and Spring
- Safety Relief Valves Modulating

- Control Valves
- Ball Valves
- Scotch Yoke Actuators
- Rack & Pinion Actuators
- Pressure Controllers
- Positioners
- Limit Switches
- Regulators

- Equipment for liquid level and solid level measurement:
 - Radar
 - Guided wave radar
 - Ultrasonic
 - Capacitive
 - Radiation-Based Measurement
 - Hydrostatic
- Level Switches

- Magnetostrictive Level Transmitter
- Direct Reading Liquid Level Gauges
- Magnetic Level Indicators Point Level Switches

- Pressure Gauges
- Pressure Transmitters
- Pressure Switches
- Diaphragm Seals
- Thermometers
- Thermowells
- Accessories

Services

Our CAD (Automation and Distribution Center) supplies maintenance, integration, repair and operational solutions to our customers, providing technical and application assistance, product options (similar brands/manufacturer/specifications) and specification review.

From scheduled repair to emergency needs, **maepsa** is supporting its customer 24/7.

Supply Services & Procurement Contracts

maepsa supplies a wide variety of products and has a broad range of capabilities to build tailored packages of products and services for projects, satisfying our customer needs in delivery times, quality and price.

Besides the large inventory and extensive services, **maepsa** is a reliable and competitive partner for projects involving equipment, spare parts and services (Procurement). Through planning stages, custom-made contracts and a tight communication with our customer; we ensure all equipments, spare parts and services required for a project are delivered in site, with efficiency, anticipation, no damage and the specified delivery times. This saves our customer from having to hold and manage their own inventory and gives them financial flexibility to allocate resources in different areas.

Inspection & Testing

maepsa's CAD provides professional inspection and testing services for different equipments.

Ultrasonic Tests

Magnetic Particle Inspection

Positive Material Identification

Dye Penetrant Liquid Inspection

Pneumatic pressure tests for process valves

Hydraulic pressure tests for process valves

Torque testing

Other

Automation & Repair

maepsa's CAD offers a 1st class repair complying with international standards. Our Quality Assurance Program provides the selection of automation packages that include process valves, mounting hardware, actuator and control panel as an integrated solution that ensures efficiency in your operation.

Furthermore, we provide a complete overhaul of actuators and instrumentation. The assemblies are fully disassembled, diagnosed, cleaned, reassembled, calibrated, and tested to meet technical requirements and international quality standards like API, ANSI, ASME, NOM, etc according to each case.

You can count on us to complete your repair quickly following the manufacturer's procedures and maintaining quality standards. Our CAD technicians have the resources to inspect, diagnose, repair and recalibrate your equipment. You can be confident that the equipment repaired through **maepsa** can be returned to service in "like new" condition.

A photograph of an industrial structure, possibly a refinery or chemical plant, with a sunset or sunrise in the background. The image is partially obscured by a white diagonal shape and a red vertical bar on the left.

Control Panels & Gas Regulation and Flow Measurement Skids Packages Builder

maepsa designs, engineers and integrates an ample variety of Panels and Control Panels of different types, whether they are Electrohydraulic, Pneumatic, Electric, etc, our specialist will always give you the right solution. Besides, we design, engineer and assemble Gas Regulation and Flow Measurement Skids packages to meet our customer's automation needs.

Whether designed by us, our clients or under the specifications of an engineering firm, we can manufacture panels that are tailored to your needs. They are assembled, inspected, tested, packaged and delivered according to our strict quality standards.

Education & Training

Education and Training services offer a variety of courses to understand products, technology trends and how can they help improve your business.

All our courses are given by trained engineers and product specialists in our facilities or can be brought to your site. We can also customize any course to meet the particular needs of your process. Upon completion, certificates will be given.

maepsa also offers demonstrations of certain products to show their performance and capabilities with our product specialists.
